

JASMEEN JAWA

UX Design Leader | Product Design · Design Systems · User Research · UX Strategy | Designer Who Builds

Bengaluru, India | +91 9538707072 | jasminejawa@gmail.com | linkedin.com/in/jasmeen-jawa-1660b263 | jawajasmine.github.io

PROFILE

UX design leader with 17+ years of experience designing and shipping enterprise, data-heavy and healthcare products for clients including Samsung SDS and Aditya Birla Group. Leads UX strategy and execution end to end — research, information architecture, interaction design, high-fidelity Figma prototyping, usability validation and design QA — and has built design systems and standardized design workflows at two organizations. A rare designer who also builds: nearly five years as a software engineer plus hands-on work in React, Vue.js and Java/Spring Boot, so designs are shaped by what engineering can ship. Mentors designers, works directly with clients and stakeholders, and measures UX by outcomes — including a 50% lift in system adoption on Samsung SDS's MES platform.

SELECTED IMPACT

50% increase in MES system adoption	40% design-system efficiency gain	35% fewer manual tasks
25% less development rework	30% operational efficiency boost	15–20% faster delivery timelines

CORE EXPERTISE

UX Leadership: UX strategy · Design vision for multi-product engagements · Design systems & guidelines · Standardized design workflows · Design-thinking facilitation · Mentoring designers · Stakeholder & client alignment

Design Craft: Information architecture · Interaction design · User flows · Wireframes · High-fidelity & interactive prototypes · Visual design · Responsive design · Data-heavy & enterprise UX · Design QA

Research & Validation: User research · Usability testing · Heatmap analysis · A/B testing · Current-state workflow analysis · Design validation with stakeholders

Product Partnership: Requirement discovery · User stories · Feature definition · Engineering feasibility · Agile/Scrum · Jira

Tools & Engineering: Figma, Adobe XD, Sketch, InVision, Photoshop, Illustrator · React, Vue.js, JavaScript, jQuery, HTML, CSS · Java, Spring Boot, REST APIs, SQL

PROFESSIONAL EXPERIENCE

Wipro Limited Team Lead · Bengaluru, India (Hybrid)	Mar 2019 – Present
Lead UX strategy and execution for top-tier clients including Aditya Birla Group and Samsung SDS, from discovery and research through design, engineering handoff and release.	
- Built a scalable design system that significantly reduced UI inconsistencies and improved collaboration between design and engineering teams. - Cut development rework by 25% by validating Figma wireframes and prototypes with stakeholders before build. - Redesigned user workflows for a 30% boost in operational efficiency; UX enhancements contributed to a 20% increase in customer adoption.	
Climate Data Utility — Global Climate Data Platform	2025 – Present
<i>Open, free global repository of company-level climate data (GHG emissions, emissions-reduction targets, assurance & verification).</i>	
- Design the Data Explorer (search, filtering, cross-company comparison) and Company Profile experiences, turning complex emissions and target datasets into a clear, usable information hierarchy for a global public audience. - Translate client and stakeholder requirements into user flows, wireframes and high-fidelity Figma designs; audit existing product behaviour to find UX gaps. - Partner with engineering on feasibility and review built screens against design before sign-off.	
Aditya Birla Group — Tinting Cloud Service	Jan 2024 – Dec 2024
Designed wireframes and high-fidelity Figma prototypes from client requirements, then built the front end in React, HTML and CSS — taking features from concept to deployment.	

Samsung SDS — Nexplant MES Cloud

Mar 2022 – Dec 2023

Cloud Manufacturing Execution System controlling factory production from order to shipment.

- Drove a full UX/UI transformation of the MES web platform, simplifying complex manufacturing workflows to reduce manual tasks by 35% and cut project timelines by 20%.
- Used usability testing and heatmap analysis to iterate on the design, driving a 50% increase in system adoption.
- Studied the client's existing system to ground the redesign in real workflows; built UI hands-on in Vue.js against Java/Spring Boot services.

Samsung — Security

Mar 2021 – Feb 2022

- Led design and implementation using user research and usability testing; interactive Figma prototypes and Photoshop mockups sharpened stakeholder feedback before build.

Relevance Lab

Dec 2014 – Mar 2019

Lead UI/UX Designer · Bengaluru, India

- Led UI/UX and end-to-end design strategy across multiple web and enterprise applications, translating stakeholder requirements into high-performing interfaces.
- Established design systems, guidelines and standardized design workflows, improving design-system efficiency by 40% and reducing product delivery timelines by 15%.
- Mentored junior designers, raising team productivity and cross-functional coordination.
- Earned client appreciation and performance-based incentives for aligning user needs with business goals.

Baya Tree Pvt. Ltd.

Apr 2010 – Dec 2014

Senior Software Engineer · India

- Spearheaded UI/UX for healthcare and enterprise platforms, leading requirement gathering and analysis with stakeholders.
- Introduced responsive design frameworks that improved usability across devices and increased user satisfaction.
- Built interactive prototypes that shortened stakeholder feedback loops and reduced rework, and worked with developers to ensure high design fidelity.

RedAlkemi

Dec 2008 – Feb 2010

Web Designer · Chandigarh, India

- Created web designs, mockups and UI assets for client projects; built strong foundations in visual design, HTML/CSS, performance, SEO and cross-browser testing.

EDUCATION

Master of Computer Applications (Computer Science) — Punjabi University, Patiala, Punjab

Bachelor of Computer Applications (Computer Science) — Guru Nanak Dev University (GNDU), Amritsar, Punjab
